Part B:

All ~~the~~ the teachers in college are ~~in~~ good but from some months some teachers don't have a good relation with students. They send all the relevant material in google class room but only some of them are explaining it through google meet or any other options available. As I heard from other students too they also say the same. If we comment or ask some teachers to explain any topic that we have not understood they say who told you to take/choose this

Part B:

All the teachers of my College are very good, but Javid Sir is my favourite because I am a political science student. His way of teaching is very good, but his way of teaching is very informative and easily understandable. I am satisfied with his way of teaching and also his interaction with students is excellent but unfortunately due to the lack of faculty in my college, he is the only professor of political science that why he is why he can't justice with his profession but still he is trying his best to satisfy his students.
