My humble suggestions from the core of my heart for the betterment of college-education in Kashmir particularly in our college are:-

Improvement in teaching-learning process. It will surely be not an exaggeration if I say that present day College Education in Kashmir looks "fake".

Now if we really want to address this problem, my suggestions from the core of my heart are:-

1. First & foremost is that let the teachers & students in shifts, be taken to the different reputed Colleges of India, e.g. St Xavier College Calcutta, etc. so that they are virtually dragged from the present state of ~~numbness~~ numbness, fakeness, slumber & what not. And are introduced to the well-planned, well inspiring, well preparedness of the teaching-learning process. It will have a magical effect on both the instructors & those to be instructed. The purposefulness of the teaching-learning process will be inspired if the teachers & students are exposed to these institutions at least for 15 days. This is my most important suggestion. Teachers shall understand how hardworking their counterparts are & students shall also know how to get the maximum from their Colleges. To make the teaching-learning process lively, lovely, inspiring, fruitful & up to the mark, the teachers

will have to be asked to refresh & enrich their knowledge by providing them training in the content they teach & training to know their students whom to teach (or teacher training). It is ironical that teachers with high qualifications even with doctorates don't have the exposure to the human Psychology. Thus can't make justice with their teaching-learning process without training in how to ~~be~~ teach.

• The teaching even in 2021 is nothing but bookish.

Students of History if not provided an opportunity to go to museum, archaeological sites, forts, & ancient buildings, not shown the manuscripts etc. will be just a mockery of teaching History.

Similarly if Zoology students aren't exposed to Zoos, National parks, Forest habitat, it will surely be fake teaching-learning process.

• Teacher-Parent Relationship:

As told earlier the college education in Kashmir looks 'fake', there is lack of teacher-parent relationship. It has to be given a fresh start.

• College education is nowadays presumed to be of no concern with diversification of courses, technical courses as these are deemed to be in 10+2 only but the fact is that College Education in Kashmir should be related to the economical well being of the students as well. Academics should not restrain the students from pursuing economic goal simultaneously.

* Reducing waste in the campus.

1. Simply ban junk foods inside the campus particularly those wrapped in polymers etc. Dust bins, waste-pits should be installed in the campus.

ere are some Ideas in my mind to make our college the best one.

⇒ How to reduce waste material within Campus.

Recycling Tips

As a result of college recycling program, you will find that recyclables are being diverted from the environmental waste stream for your town. This should allow college to reduce size of waste collection dumpsters or frequency of pick-up. By doing this the college can save money.

Involve everyone: Get support and approval from top administration involve all employees and students.

Locate recycling service companies & markets for the recyclable materials: Find a waste hauler who picks up recyclable material or a local business who is in need of material.

Locate where the recyclable materials are generated & place bins efficiently.

Cafeteria: Locate bins for paper, cardboard, cans, bottles & plastic.

Administrative: Locate bins for office paper, cardboard & inner cart ridges.

Library: Locate bins for magazine, newspaper & books.

Classrooms: Locate bins for paper, bottles, & cans.

Start with a waste audit: A waste audit will enlighten a company to volume, composition, origin points, what could be recycled, what could be reused, & what can be eliminated. An audit is also useful to determine what materials are used that could be substituted with recyclable materials.

The Ideas (about teaching-learning) which are in order to make college the best one are as below

1. Starting short research programmes.

Scientific research helps students develop critical skills. Such skills are helpful for any field of study but is particularly helpful for science major studies. Research helps enhance your understanding of the process develop in the lab can & make it alive.

2. Best management skills

3. Discipline (as discipline is key to success).

4. Create a sustainable student Farm.

5. Focus on creating spaces, where students can be together.

Add more subjects in the college by which prefer to get admission in this college.

For example:- If a student is weak in chemistry to choose some other subject (e.g sericulture) of chemistry, but that subject is not present in our by which he/she suffers & choose the subject he/she is not interested.

How to make teaching better:-

Starting up the lesson is crucial in teaching. Try to draw students' attention from beginning.

Teachers should be aware of the fact that they should deal with students whose English is too weak.

While giving the lesson, teachers should be like a camera: Don't keep looking at one student.

Connect to students individually.

Prepare to work with Parents.

Consider new learning methods.

Batch: 2021.

★ Ways to improve teaching learning better?

• Ask them (students) to take a topic for self-learning.

• By Conduct debates, seminars & talks for the students.

• Encourage them to ask questions.

• Use assessment to inform students of their achievement.

• Use better graphics and visual media to engage students well.

Better graphics and colours arouse the interest and desire to learn among students.

• Make Community Collages a lab for better teaching.

Ways to reduce wastes in Campus ...?

Say no to disposable water bottles & plastic items.

- Reduce food waste.
- Perform a waste Assessment.
- Recycling Program must be developed in the Campus.
- Chemical wastes → that come from chemical laboratories. So we must do cleansing services in Campus.
- We must remember about 7R's of waste management i.e. Reuse, repurpose, rot, repair, return, refill, and refuse.

Ways to improve College...?

- Keep the Campus grounds clean
- Take students on Nature tours.
- Transport facilities must be developed in college.
- Parking slots must be increased for students as well as teachers too.
- Connects students to local charities and volunteer opportunities.
- Creating Spaces where students can come together.
- Improvement in Library. Because library is one of the important facility used frequently used by students and faculty also.
- Canteen management system must be developed with proper items and mess along with seats.

Take an environmental commitment, and
add the word!

How to Make Teaching Better:

1. Adjust your expectations about how much content you'll cover and how quickly.
2. Don't try to recreate your in-person lessons over Zoom. Try a new approach if you feel stuck.
3. Use collaborative, digital workspaces to better understand student thinking.
4. Give explicit instructions and stick to routines.
5. Craft an intentional, inclusive camera policy for synchronous learning.
6. Give students more time than usual to talk about what's going on in the world, share their feelings, or just vent.
7. Celebrate the new skills students are learning.

How to reduce waste inside the Campus

Date 20 / 11 / 2022

Make an environmental commitment, and spread the word!

Conduct a waste audit.

Organize sustainable move-in and move-out programs.

Go plastic free.

Create an on-campus thrift store or arrange clothing swaps.

Develop campus-wide incentive programs to reinforce positive behaviour.

Start a terracycling program for your "unrecyclable" goods.

Partner with local organizations, nonprofits, etc. to form a food recovery plan. Alternatively,

start in composting.

celebrate environment-related days or plan your own events.

think about concessions at athletic events.

Get out...
